BirdWatchCam

Millions of people love taking pictures. Millions of people love watching birds. Many millions of people love taking pictures of the birds they watch. The dilemma for most people is that there is never enough time to do either, let alone both! Now there is an EASY and fun way to do both even if you don't have as much time as you would like.

We at Brinno Incorporated are very proud to introduce the

BirdWatchCam

The BirdWatchCam is a low cost, EASY to use, weather resistant, motion activated Birding Camera, that is EASY to mount and target at your bird feeder, birdbath, or anywhere that birds go.

The BirdWatchCam is designed to sense the motion of birds entering the camera's field of view. Once the motion sensor is activated, the BirdWatchCam wakes up for 20 seconds to take an average of 20 high quality, time stamped still photos that store on the 2GB SD Card included with your BirdWatchCam. After taking the photos the BirdWatchCam goes back to sleep until another bird activates the camera again. This ensures that the BirdWatchCam's 4AA batteries that are included will last a long time.

About Brinno

Brinno Incorporated is dedicated to providing products that enhance the enjoyment and safety of family life.

Brinno is focused on education, leisure, hobby and personal safety cameras, designed with quality and manufactured for reliability. Brinno has put together a team consisting of world class semiconductor partners, experienced EE design engineers, multiple OEM electronics manufacturing, materials tooling and manufacturing partners, allowing control of manufacturing costs while ensuring the highest standards of design and quality. Brinno products are available online and worldwide through better retailers everywhere.
