Initial Operation

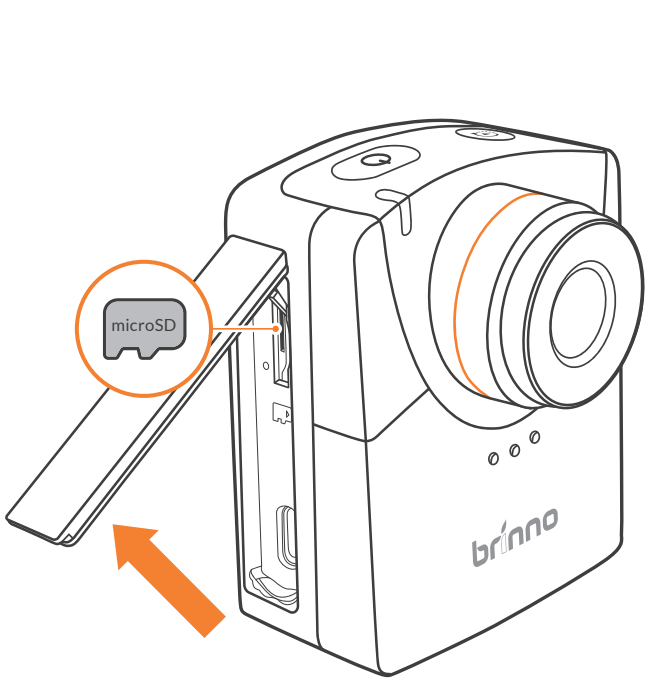
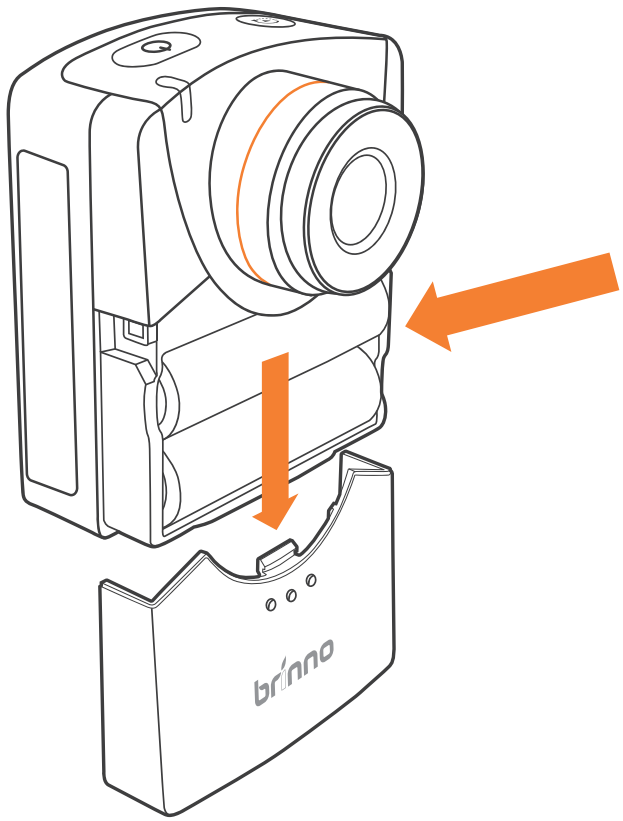
INSTALL microSD CARD & BATTERIES

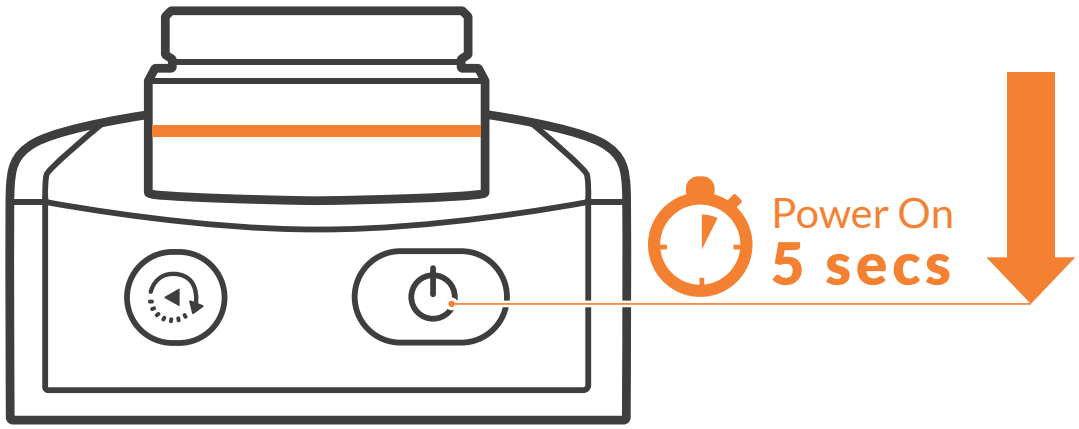
1. Insert microSD card. *1
2. Open battery door. Then install 2 AA batteries.

*1 Support up to 128GB microSD card. For 64 or 128 GB microSD card, follow instruction on the LCD screen to format the card before using it the first time.





POWER ON / OFF



1. Power on: hold “**Power Button**” for 5 secs.
2. Power off: hold “**Power Button**” for 3 secs.

POWER SAVING MODE

When the camera is turned on, and there is no recording job:

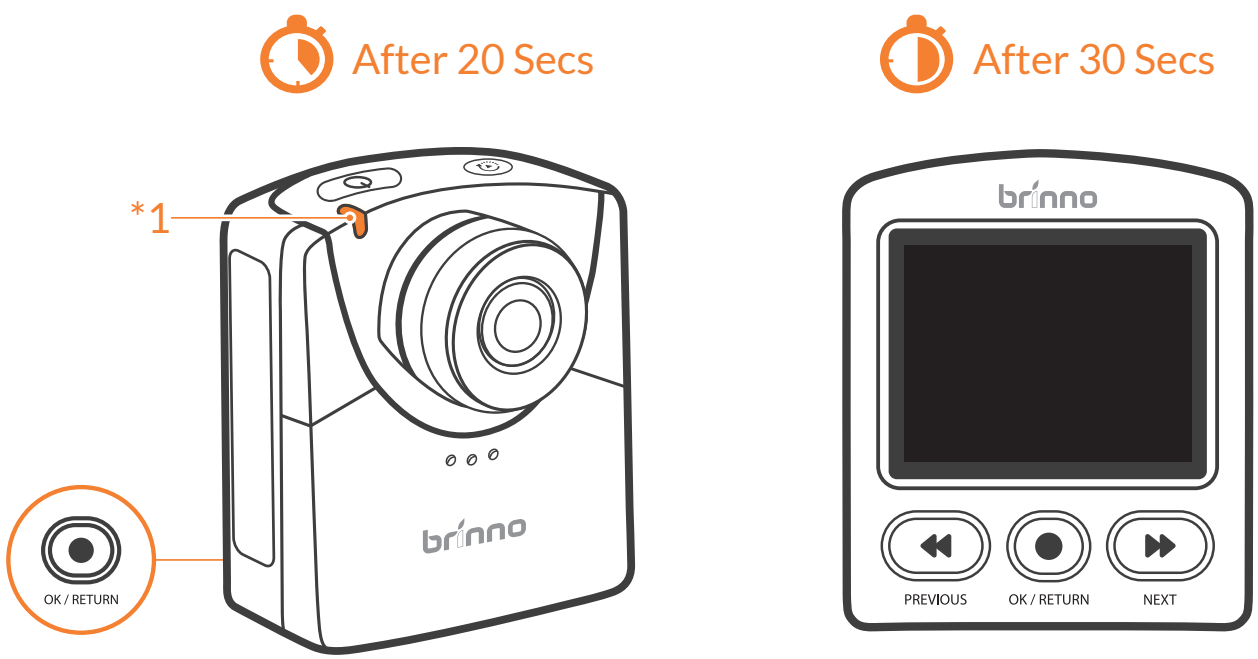
Sleep Mode

The camera goes to sleep mode to save power after 20 seconds without activity. The LED indicator turns solid green*1.

Press " ● " button to wake up the camera.

Power off

The camera shuts down after 30 seconds without activity.



SET DATE & TIME

The date & time menu appears when the camera is first turned on.

1. Set the numeric value using "◀◀ / ▶▶".
2. Press "● " button to confirm and go to next option.

Prepare For Shooting

CHANGE CAPTURE MODE

1-1. At preview screen, press "⏪" button to go to **CAPTURE MODE** setting.

1-2. Select desired **CAPTURE MODE** and press "⏺" button to confirm and return to preview screen.

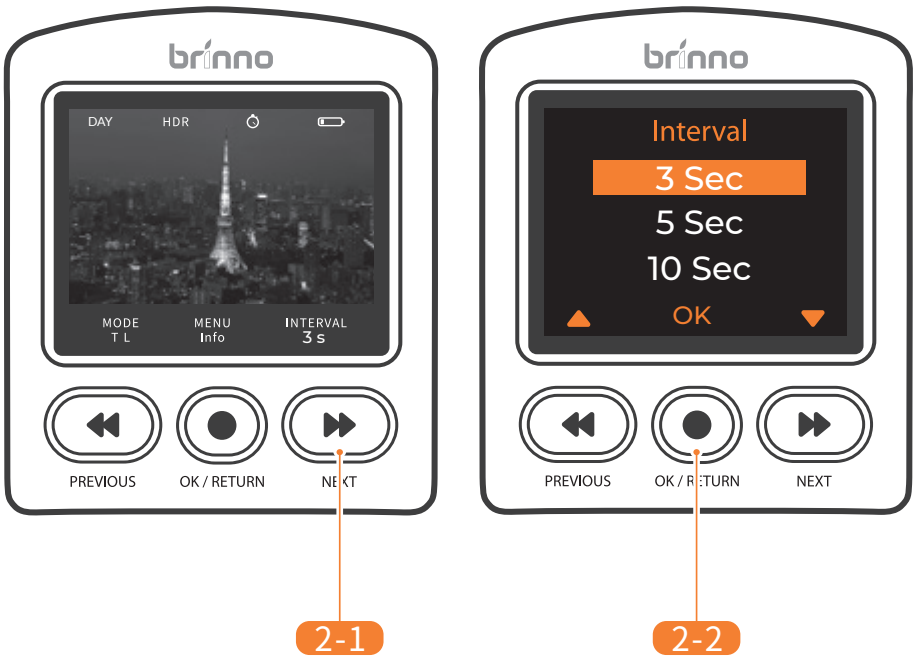
CAPTURE MODES

Capture mode	Description
Time Lapse	Camera captures series of photos at a time interval of your choice, and auto combines them into a ready-to-view time lapse video.
Step Video	Camera records a short video clip at a selected capture interval, and auto combines those clips to a ready-to-view step video.
Still	Capture single still photo.
Stop Motion	Manually press the shutter to take multiple photos one frame each time. The camera then auto combines those photos into a stop motion video.

CHANGE CAPTURE INTERVAL

2-1. At preview screen, press "⏩" button to go to **CAPTURE INTERVAL** setting.

2-2. Select your desired interval and press "⏺" button to confirm and return to preview screen.



CAPTURE INTERVAL

Capture mode	Interval options
Time Lapse	Select the desired capture rate
Step Video	Burst Length Burst Interval
Still	✕
Stop Motion	✕

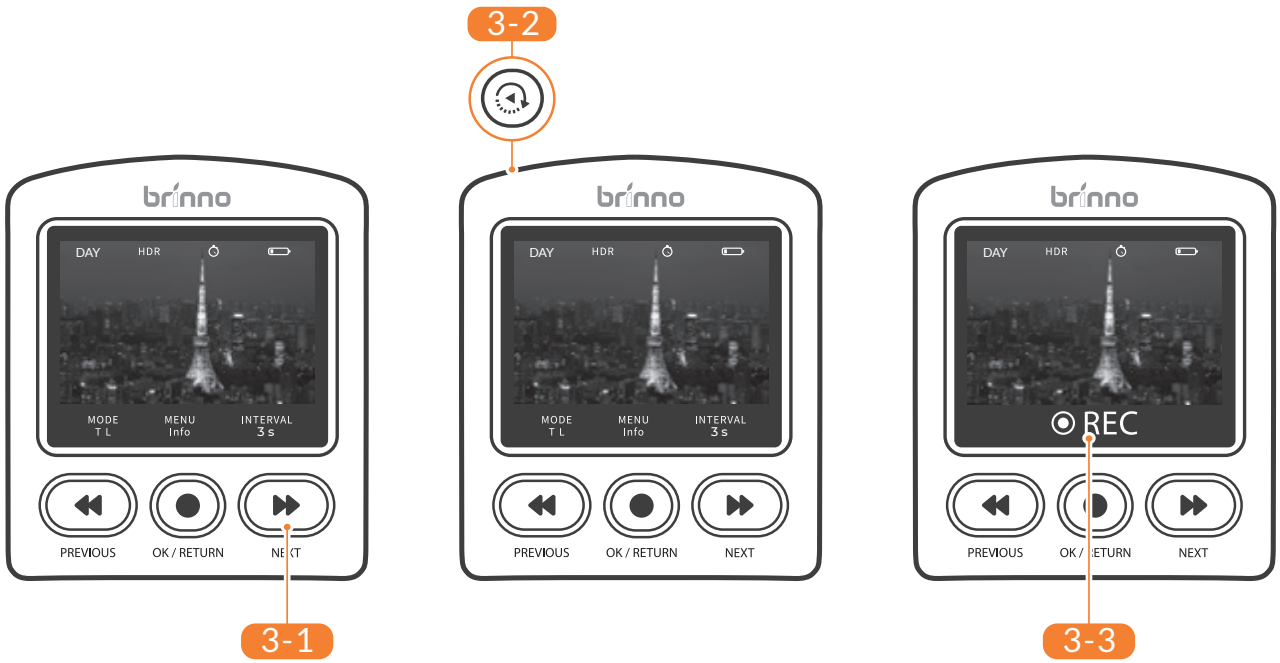
TIME LAPSE / STEP VIDEO RECORDING

Start

3-1. At **TIME LAPSE** or **STEP VIDEO** mode, press " ⏩ " button to select capture interval. Press " ● " button to return to preview screen.

3-2. Press "**SHUTTER**" button to start recording.

3-3. The LCD screen displays "**REC**" icon along with beep sound. The LCD screen then turns off to save power.



TIME LAPSE / STEP VIDEO RECORDING

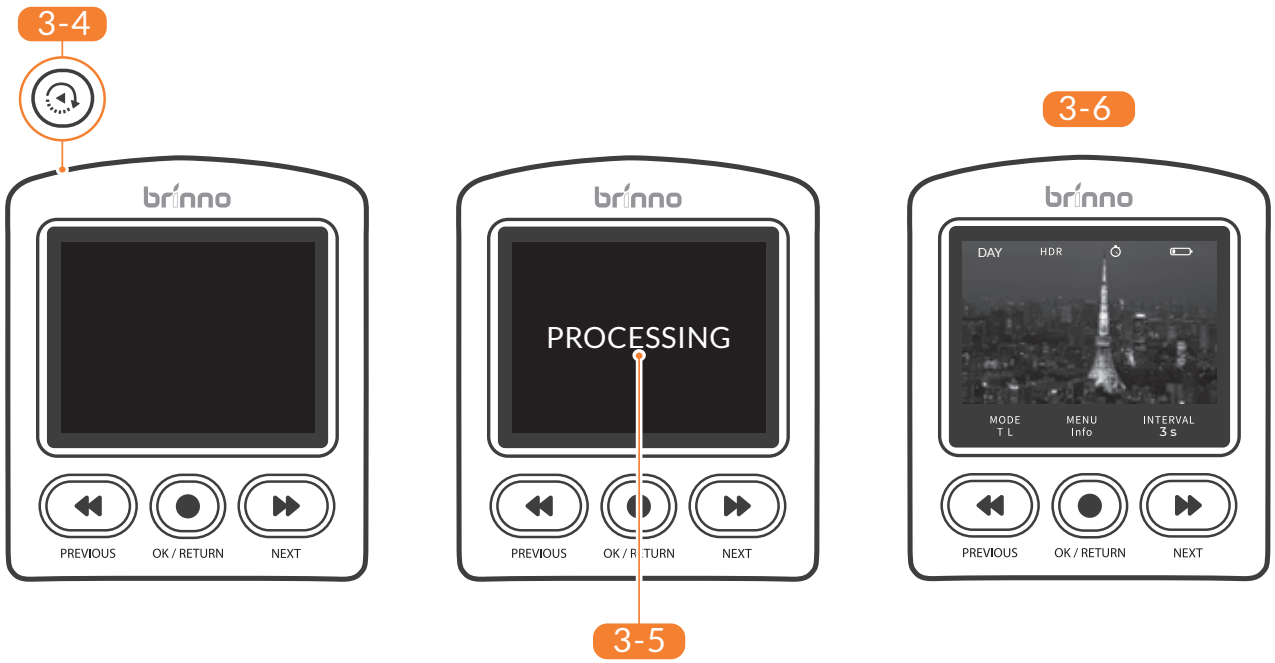
Stop

3-4. Press“**SHUTTER**” button to wake up LCD screen. The camera stops recording and starts post-editing video immediately.

3-5. LCD screen displays “**PROCESSING**” icon accompanied by beep sound* to confirm the completion of video post-editing.

3-6. The camera returns to preview screen after the video is completed.

⚠ Note: 3 beeps for time lapse mode; 4 beeps for step video mode



STOP MOTION RECORDING

Start

4-1. At **STOP MOTION** mode, press "**SHUTTER** " button. LCD screen shows "**Initializing Stop Motion** " followed by a beep to start recording.
